FISCOMM ENGINEERING

**Years of
Continued Service**

STRIVING TO DISRUPTIVE INNOVATION

COMPANY OVERVIEW

Fiscomm Engineering is a premier Fire Alarm, Fire Fighting, Security and Building Management Systems integrator and supplier. Fiscomm Engineering was established in 2004, and has grown to become one of the best suppliers and service provider throughout Ethiopia. In late 2007 the company was restructured in the area of network Infrastructure WAN and LAN, telecommunication and electro mechanical systems emerged as one of the most effective suppliers and system integrator.

We provide design, engineering, supply, installation, testing, and maintenance of network Infrastructure and data center implementation, telecommunication, HVAC system, nurse call system, Fire Alarm, Fire Fighting, Security Systems, Access Control, CCTV, Intrusion, Intercom Systems, Communication Systems, Video Surveillance and Security products such as Mass Notification for commercial buildings, industrial plants, hotel, apartment and more.

We have built strong strategic partnerships with our product vendors who are world leaders in the manufacture and development of products on the forefront of technology. As a factory certified representative, you can be assured only factory original parts will ever be provided. Fiscomm Engineering warrants all products to be free from defects in material and workmanship for a period of one year from the date of first beneficial use of all or any part of the system.

When developing a new system solution or upgrading an existing system, Fiscomm engineering, is your full service provider for consultation, design, supply, installation, support and ongoing monitoring or service needs. Each system is custom designed based upon your facilities unique characteristics and professionally installed by factory trained and certified system technicians. Our licensed professionals work to provide systems that comply with government codes. We also provide system monitoring, preventative maintenance contracting, confidence testing, and inspection services to ensure your business investment is continuously running and protected at all times.

SYSTEM OVERVIEW

Fiscomm Engineering is a total solution provider capable of managing the complete life cycle of your system from commissioning to retirement. In all of Fiscomm Engineering's projects, we focus on three important phases of the customer relationship to ensure your total satisfaction.

DESIGN AND ENGINEERING

In the initial stages of your project, Fiscomm Engineering focuses on understanding the needs of your organization and developing a system to meet those needs. We will put our experts to work for you to design a system that will provide satisfactory solution.

INSTALLATION

The next step in our relationship will focus on the precise delivery of your designed system while keeping you informed during each step of the process. Our highly-trained and certified professionals will take the time to ensure that every component is installed with meticulous detail.

SERVICE AND SUPPORT

The final and ongoing stage in our relationship is support. To ensure that you're system provides you with years of reliable service, Fiscomm Engineering will continue to provide exemplary support after the installation.
